BRANSON ROSE

FRONT-END DEVELOPER | REACT & TYPESCRIPT

Ontario, Canada | branson@bransonrose.dev | bransonrose.dev
github.com/BRoseFE

PROFESSIONAL SUMMARY

Front-End Developer specializing in React, TypeScript and modern web application development. Builds responsive, component-based applications and has hands-on experience integrating REST APIs and headless CMS platforms, managing asynchronous application data, and deploying live websites. Brings a practical, detail-oriented approach shaped by a client project, independent development work, professional technical certifications and experience in technical field operations.

TECHNICAL SKILLS

Frontend	React, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Router, CSS Modules, Chakra UI
State & data	TanStack Query, Zustand, React Context, asynchronous data fetching, caching, pagination, infinite scrolling
APIs & services	REST API integration, Axios, custom API clients and hooks, Vercel Serverless Functions, Sanity CMS, GROQ
Tools & delivery	Git, GitHub, Vite, npm, VS Code, Vercel
Practices	Responsive design, reusable components, semantic HTML, accessibility, keyboard navigation, loading/error states

FEATURED DEVELOPMENT PROJECTS

Chelsea Rose Art Portfolio | Client Project

chelsearose.art | *React 19, JavaScript, Sanity CMS, Sanity Studio, GROQ, TanStack Query, Vite, Vercel*

- Developed and deployed a custom React application for a client to showcase and organize original artwork in a responsive, image-focused experience.
- Integrated Sanity CMS and a dedicated Sanity Studio so artwork, metadata, publication status and display order can be managed independently of frontend code.
- Used GROQ queries and the Sanity Client to retrieve published artwork dynamically, replacing hardcoded content with a centralized content workflow.
- Implemented slug-based artwork pages with React Router, providing dedicated, shareable URLs for individual pieces.
- Configured image delivery with Sanity's image URL builder for dynamic resizing, format selection and image-quality adjustments; used TanStack Query for fetching, caching, loading and error states.

Video Game Hub | Independent Project

Live application | *React 19, TypeScript, Vite, Chakra UI, TanStack Query, Zustand, Axios, GameBrain API, Vercel*

- Built a responsive game-discovery application integrating the GameBrain API for searchable game data, filtering, sorting and detailed game information.
- Implemented infinite scrolling and paginated discovery with TanStack Query, including query caching and background data management.
- Centralized search and filter state with Zustand and created reusable TypeScript API clients and custom React Query hooks.
- Developed a Vercel serverless API layer to proxy permitted GameBrain requests and keep API credentials in server-side environment variables.
- Created detailed game pages with descriptions, screenshots, trailers, platform and publisher information, ratings and Metacritic scores.

ADDITIONAL DEVELOPMENT PROJECTS

React Template Marketplace | In Development

Independent business project | React, TypeScript, Vite, Supabase, PostgreSQL, Stripe, Vercel

- Developing a digital-product marketplace intended for independent business operation, where customers will be able to browse, purchase and securely download React templates.
- Planning a Supabase-backed architecture for customer authentication, relational data management and private product-file storage.
- Designing Stripe checkout and verified-order workflows, with Supabase Edge Functions planned for server-side payment verification and purchase-authorized downloads.

Project is in development. Technologies and capabilities listed here describe the planned architecture, not completed production functionality.

Personal Developer Portfolio

bransonrose.dev | React, TypeScript, Vite, HTML5, CSS3

- Migrated a static HTML/CSS portfolio into a component-based React and TypeScript application while preserving its visual identity.
- Built responsive layouts and navigation with custom CSS, CSS Grid and Flexbox, using semantic HTML and accessible interface patterns.
- Organized project, skills, certification and professional information into reusable components; used Vite for development builds and asset handling.

PROFESSIONAL EXPERIENCE

Fibre Optic Technician | Glencoe Installation (NFTC)

2024–2026

- Installed and maintained fibre optic cabling in underground, aerial and indoor environments.
- Performed fibre optic splicing, termination and testing; diagnosed connection issues and network faults.
- Completed installations and quality inspections in accordance with technical specifications and safety procedures.

Concrete Finisher | Akko Ltd Cement Finishers

2020–2023

- Performed concrete forming, pouring and finishing as part of construction projects.

Trooper, Armoured Reconnaissance | Canadian Army Reserve

2015–2016

- Participated in training focused on surveillance, reconnaissance and counter-reconnaissance techniques.
- Maintained familiarity with armoured vehicles, vehicle systems and operational-readiness procedures.
- Trained in the use of military communications radios and sensors; completed unit administration and maintained required qualifications.

EDUCATION & CERTIFICATIONS

Police Foundations Diploma | Westervelt College, 2014–2015

Meta Full-Stack Developer Professional Certificate | Meta / Coursera, 2026

Meta Front-End Developer Professional Certificate | Meta / Coursera, 2026

Google Cybersecurity Professional Certificate | Google / Coursera, 2024

Additional coursework: Python, Django and Django REST Framework. Coursework exposure; not represented as professional or project-based experience.
